

## LEVELER LEGS & TOE KICK INSTALLATION

### LEVELER LEGS INSTALLATION

#### STEP 1

Flip the cabinet upside down. Insert the base leg into the bottom of the cabinet. Then, insert the leg tightener into the base leg to tighten the base into place.

#### STEP 2

Insert the leg tube into the base leg. Then, screw the adjustable leg into the leg tube.

### STEP 3

Attach the base leg to the bottom of the cabinet with the stainless steel screws provided. DO NOT OVERTIGHTEN!

### STEP 4

Adjust the leveling legs to bring the cabinet to a leveled position.

## TOE KICK INSTALLATION

### STEP 1

Lay the trimmed toe kick panel in front of the cabinet against the Leveling Legs. Mark the location of each leg on the back of the toe kick.

### STEP 2

Center the plates halfway up the height of the toe kick, screw them into place. Then slide a clip into each plate.

### STEP 3

Clip the toe kick to the legs.

## NOTE

If you apply toe kick around corners and have adjacent panels that clips to the same corner leg, be sure to stagger the clip plates heights so they overlay properly.
